

CHEM 1220 – Principles of Chemistry II

Syllabus

Instructor: Dr. Shawn M. Miller

Fall Term, 2019

Email: shawn.miller@usu.edu

Office Hours: M/W 2:30 PM – 3:30 PM
Widtsoe 339

Course Lecture/Recitation Times & Locations:

Section (CRN)	Time	Day(s)	Location
Lecture 001 (40931)	1:30 PM to 2:20 PM	M/W/F	Widtsoe Hall 007
Recitation 501 (40935)	1:30 PM to 2:20 PM	T	Engineering Laboratory 248
Recitation 502 (40939)	8:30 AM to 9:20 AM	F	Huntsman Hall 132
Recitation 503 (40940)	9:30 AM to 10:20 AM	F	Geology 302
Recitation 504 (40941)	10:30 AM to 11:20 AM	F	Huntsman Hall 360

Prerequisite:

CHEM 1210

Required Materials:

Text: Brown, LeMay, Bursten, Murphy, Woodward, Stoltzfus *Chemistry: The Central Science*, 13th ed.; Pearson Education, Inc. (ISBN: 978-0-321-91041-7) (earlier editions are fine)

Calculator: A non-programmable scientific calculator is recommended for use in Lecture and on Exams. Programmable calculators are permitted during Exams only if their memory is cleared by the Testing Center. Other electronic devices, including phones, are not permitted during Exams.

Optional Materials:

iCicker: iClicker 2s are used during the Lecture period and extra credit is awarded through the use of iClickers. iClickers must be registered by the beginning of class. To register an iClicker, use the link in the navigation sidebar on Canvas.

Supplementary Course Assistance:

This course provides an SI and UTF in addition to the course Teaching Assistant (TA) to provide supplementary assistance to the main Lecture period and instructor Office Hours. Attending these sessions are completely optional, but you are strongly encouraged to make use of these resources.

SI Information: Annalee Hovinga (contact: annahovinga@gmail.com or Canvas)

Session Times: Tuesday 6:30 PM – 7:20 PM in HH 222

Thursday 6:30 PM – 7:20 PM in HH 322

UTF Information: Emma Thornton (contact: emmathornton22@gmail.com or Canvas)

Session Times: Monday and Wednesday 5:00 PM – 5:50 PM in HH 160

TA Information: Dylan Keiser (contact: dylankeiser@suumail.net or Canvas)

Office Hour Times: Tuesday 2:30 PM – 3:20 PM in Widtsoe 211

Thursday 10:00 AM – 10:50 AM in Widtsoe 211

Course Overview

CHEM 1220 is the second in a two-semester series of general chemistry courses that is targeted towards science and engineering students and builds upon the lessons learned in CHEM 1210 and meets three times a week. Lectures will include both presentation of content and practice problems. Recitations will be held once a week for additional practice with course material. There will be an online Post-Week Quiz on Canvas at the end of each week designed to help prepare students for the Exams. There will be three 60-minute Midterm Exams in addition to a 120-minute Final Exam all of which will be proctored on Canvas via the Testing Center.

Course Learning Objectives

CHEM 1220 is a Lecture course designed to continue the education process began in CHEM 1210. By reading the textbook prior to the Lecture period, you will obtain a basic understanding of the upcoming Lectures' topics. By attending, taking notes during, and asking questions during Lecture periods, you will expand and refine your understanding of the course material. You will demonstrate proficiency of the course material through weekly in-Lecture clicker questions, Recitation worksheets, and online Canvas Quizzes. You will demonstrate mastery of the course material through three Midterm Exams and a Final Exam.

By the end of this course, you will be able to...

- ...describe science as a process for discovery.
- ...list key fundamental chemistry theories and principles.
- ...use fundamental chemistry theories and principles to explain or predict a result when presented with a chemistry scenario.
- ...identify and use the appropriate equation(s) and problem-solving tool(s) needed to solve a chemistry problem.

- ...calculate and correctly write scientific values using algebra and other fundamental mathematical skills.
- ...answer conceptual chemistry questions using short-form writing.

A detailed set of Learning Objectives for each chapter is located at the end of this syllabus.

You will prepare for and practice achieving these objectives by...

- ...reading the textbook while taking notes.
- ...attending and taking notes during Lecture periods.
- ...attending and participating in weekly Recitation sections.
- ...taking weekly graded online Post-Week Quizzes on Canvas.
- ...reviewing your performance on the Post-week Quizzes.
- ...asking for help via Office Hours, Piazza, Canvas message, or e-mail.
- ...optionally attending UTF or SI sessions for problem solving and further assistance.

You will be assessed on how you have achieved these objectives using...

- ...one Getting Started Quiz on Canvas.
- ...the aforementioned Recitation sections.
- ...the aforementioned Quizzes on Canvas.
- ...three Midterm Exams.
- ...one Final Exam.

Course Communication

Piazza is the recommended venue for asking academic questions about the course. Piazza is a free online system that can be accessed directly through Canvas designed for students to have access to rapid and efficient help from classmates, TAs, and the instructor simultaneously. **Piazza is not to be used to convey personal information.** Contact the instructor directly if you need to discuss personal information such as grades.

When you post a question on Piazza, the instructor, the UTF, the SI, the TA, and your fellow students can all answer the question making it more likely for you to receive a rapid response compared to emailing one person and hoping they read it soon. Maybe you'll even get lucky and someone will have already asked the question you were going to ask and got it answered! You have the option of posting anonymously to each other, but the instructor will always be able to see your identity. Enroll in the course by clicking on the "Piazza" link in the sidebar on Canvas and following the instructions there.

2 extra credit points will be awarded to all students who enroll in Piazza regardless of their use of the service provided they enroll by 11:00 PM on the Friday in Week 1 of the term.

You are always welcome to message the instructor with questions. Canvas messages are preferred, but email is fine as well. Please include your full name, A-Number, and the course name in your message. I will attempt to respond to your messages in a timely manner, but I have responsibilities outside of the course that may prevent me from doing so, and I ask you to exercise patience after sending your message.

The instructor will hold regular office hours as listed in this syllabus as well as by request.

Course announcements will be made using Canvas. You are expected to check Canvas at least once a day and are responsible for any information in the announcements. "But I did not know" is not an acceptable excuse for being unaware of information in course announcements.

Getting started in the course

Read the course syllabus. Once that is done, your first assessment is a "Getting Started" online quiz located on Canvas that will cover course policy as discussed in the syllabus. This Quiz is due at 11:00 PM on the Friday of Week 1 of the term. The Getting Started quiz will be graded immediately upon completion and may be attempted an unlimited number of times. Correct answers will not be shown upon completion of the Getting Started Quiz, but you will be able to view your responses. If multiple attempts are made, the **latest** score will be accepted. **If you see no score in your Grades, no attempt was submitted.** The Getting Started Quiz score cannot be dropped.

USU welcomes students with disabilities. If you have, or suspect you may have, a physical, mental health, or learning disability that may require accommodations in this course, please contact the Disability Resource Center (DRC) as early in the semester as possible (University Inn #101, 435-797-2444, drc@usu.edu). All disability related accommodations must be approved by the DRC. Once approved, the DRC will coordinate with faculty to provide accommodations.

Lectures and Recitations

It is assumed that you read textbook sections, as outlined in the schedule at the end of this syllabus, prior to discussing them in Lecture. You are strongly encouraged to take notes while reading the textbook and then supplement those notes with Lecture. You are not expected to understand the material simply by reading the textbook, but reading the chapter will build a foundation that we can expand and refine through our discussions in Lecture. PDF copies of blank Lecture PowerPoint slides will be available on Canvas that can be printed ahead of each Lecture if you wish. Each Lecture will be recorded and available on Canvas for viewing at your pleasure.

You must be registered for a recitation section (CHEM 1220 sections 501-504). Recitations will involve guided, group problem sessions. Recitation attendance is required and participation in each Recitation is worth 5 points. The lowest Recitation score will be dropped.

iClicker Questions

iClicker questions will be asked through the Lecture period and will be used as a way to assess class understanding of topics by providing immediate feedback to both the instructor and you. These questions must be answered individually, but consulting your notes and discussing with your classmates is allowed. It is your responsibility to register your iClicker either through the iClicker service on Canvas or at iclicker.com, and to remember to bring your iClicker, in working order, to class each day. iClicker questions will be utilized on Day 1, but student performance will not be recorded until the third Lecture period.

To encourage you to attend, prepare for, and be attentive during lectures, you may earn up to 10 points extra credit via iClicker questions. 5 of those points are allocated to participating in iClicker questions, and the remaining 5 points are allocated to answering iClicker questions correctly. The amount of extra credit awarded will be based on the percentage of iClicker questions answered by each student based on the total number of questions asked and the percentage of correct answers to iClicker questions based on the total number of questions asked.

Quizzes

There are 13 graded Post-Week Quizzes in the course. Unless stated otherwise, the Quiz will open at 3:00 PM every Friday and will be due the following Monday at 1:00 PM. These Quizzes contain 15 questions each worth 1 point about material covered in the previous week. You will have 45 minutes to complete the Post-week Quiz and you may use your textbook and notes, but you must work alone. You should treat Post-Week Quizzes as practice for the Exam in terms of both format and content. You may take each Post-Week Quiz twice to account for any technical difficulties you encounter, such as losing power or logging out accidentally. After successfully completing the Quiz, you may choose to retake the Quiz to try and maximize your score, but note that only the **last** attempt will be accepted. Therefore, if your second attempt at the Quiz has a lower score than the first attempt, the second attempt's score is still what will be counted as your score for the Quiz. The lowest two Post-Week Quiz scores will be dropped at the end of the course.

Examinations

There will be three 60-minute Exams, worth 100 points each, that will be administered on Canvas in the Testing Center according to the following schedule:

First Exam:	Wednesday, September 25 to Friday, September 27
Second Exam:	Wednesday, October 23 to Friday, October 25
Third Exam:	Monday, November 18 to Wednesday, November 20

These Examinations will consist of 25 questions worth 4 points each. Question formats may include, but are not limited to, multiple choice, multiple answer, matching, short written answer, and fill-in (dropdown and text).

Make-up Exams for missed Exams may be granted upon petitioning the instructor only in the following situations: 1) documented and acceptable excuses for illness when verified by a doctor's note; 2) a family emergency when verified by a note from your academic advisor; 3) a regularly scheduled university-sanctioned conflict, such as a sports competition the student is participating in, but only when the instructor is notified well in advance of the conflict and verified with a note from the person in charge of the activity containing the specific reasons for the absence. Absences due to

reasons not considered by the university to be excused absences, such as weddings, are not eligible for make-up Exams.

The only materials permitted in the Testing Center will be writing utensils and calculators (scientific preferred, graphing only if the Testing Center clears the memory). The Testing Center will provide laptops and provided auxiliary materials as well as scratch paper upon request. Reservations for the Testing Center are made through their website at <http://testing.usu.edu/>. Ensure you bring a form of ID with you in order to Check-in for your Testing Center appointment.

A 120-minute cumulative Final Examination will be held in the Testing Center on from Monday, December 9 to Wednesday, December 11.

Academic Integrity

All Utah State University academic integrity policies are strictly enforced. All students at Utah State University agree to be bound by the following Honor Pledge "I pledge, on my honor, to conduct myself with the foremost level of academic integrity." See the following for further information: <https://studentconduct.usu.edu/studentcode/article5>. Students found guilty of academic misconduct on any assignment will, **at minimum, be given a zero for the assignment and have the full value of that assignment deducted from their final course grade.** Actions up to and including a failing grade for the course are options available to the instructor.

Course Assessment

After the first Exam, the instructor will solicit feedback through optional midterm evaluations on Canvas. The purpose of these surveys will be to determine student opinions of the course up to that point and ask for suggestions on what could be done to improve the course for the rest of the semester and in subsequent semesters. The instructor will know who completed the survey, but will be unable to match survey responses to students. Each student who responds to the midterm evaluation will be granted a small quantity of extra credit points. At the end of the course, end-of-term IDEA evaluations administered through University will be sent to students via email. The instructor will know who completed the survey, but will be unable to match survey responses to students. Each student who responds to the end-of-term evaluation will be granted a small quantity of extra credit points.

A Pre-test/Post-test approach will be used to measure comprehension and teaching of important concepts. The Pre-test will be administered online through Canvas. The Pre-test will be comprised of 20 questions with a duration of 60 minutes. The questions of the Pre-test will reappear in the Final Exam, in some form, to assess teaching and learning progress during the semester. If weaknesses are observed in specific subject areas, teaching methods will be reevaluated. An all-or-nothing 10-point reward will be given for completing the Pre-test. The Pre-test opens at the beginning of the course and is due at 11:00 PM on the Friday of Week 1.

Grading

The total score for each type of assignment represent totals after appropriate lowest scores have been dropped.

Getting Started Quiz	20	Percentage of Points Earned	Grade
Pre-Test	10	88 – 100	A-, A
Recitation Worksheets	45	77 – 87	B-, B, B+
Post-Week Quizzes	165	60 – 76	C-, C, C+
First Exam	100	50 – 59	D, D+
Second Exam	100	< 50	F
Third Exam	100		
Final Exam	200		
<hr/> Total points	740		

Letter grades are assigned by taking the total numerical score, rounding to the nearest whole number, finding the percentage of total points earned, and then assigning a letter grade according to the table above. The grade thresholds may be lowered depending on course performance, but will never be increased. The administration of CHEM 1220, including the issuing of grades of Incomplete, will adhere to the outlines in the USU General Catalog.

Fall 2019 Schedule

Please look carefully at the following schedule for the correct order of Lectures. Note that this schedule is approximate and may adjust slightly depending on course pace.

Red text denotes Exams and the **Blue text** denotes holidays where Lecture will not be held.

Week	Day	Date	Lecture	Topic	Chapter	Recitation	Assignment Due	
1	M	8/26	1	Course intro, Reaction rates	14	none		
	W	8/28	2	Concentration and rates	14			
	F	8/30	3	activation energy	14		GS Quiz/Pre-Test	
2	M	9/2	Labor Day			all	P-Quiz 1 (Tues.)	
	W	9/4	4	Reaction mechanism	14			
	F	9/6	5	Equilibrium	15			
3	M	9/9	6	Equilibrium constants	15	all	P-Quiz 2	
	W	9/11	7	Le Chatelier's Principle	15			
	F	9/13	8	Water, Acid/Base	16			
4	M	9/16	9	pH, strong acids/bases	16	all	P-Quiz 3	
	W	9/18	10	Weak acids/bases, K_a , K_b	16			
	F	9/20	11	Buffers	16			
5	M	9/23	12	catch up, prepare for exam 1	16	none	P-Quiz 4	
	W	9/25	First Exam (Ch 14-16)					
	F	9/27	13	Common ions	17			
6	M	9/30	14	Buffers, acid-base	17	all		
	W	10/2	15	Titrations	17			
	F	10/4	16	Solubility	17			
7	M	10/7	17	Solubility (cont)	17	all	P-Quiz 5	
	W	10/9	18	Spontaneous processes	19			
	F	10/11	19	Entropy and the second law	19			
8	M	10/14	20	Entropy in reactions	19	none	P-Quiz 6	
	W	10/16	21	Gibb's Free Energy	19			
	R	10/18	Fall Break					
9	M	10/21	23	catch up, prepare for Exam 2		none	P-Quiz 7	
	W	10/23	Second Exam (Ch 17-19)					
	F	10/25	24	Redox reactions	20			
10	M	10/28	25	Voltaic cells	20	all	P-Quiz 8	
	W	10/30	26	EMF	20			
	F	11/1	27	Batteries	20			
11	M	11/4	28	Electrolysis	21	all	P-Quiz 9	
	W	11/6	29	Radioactivity, nuclear decay	21			
	F	11/8	30	Energy considerations	21			
12	M	11/11	31	Periodic concepts	22	all	P-Quiz 10	
	W	11/13	32	Noble gases/halogens/oxygen	22			
	F	11/15	33	catch up, prepare for Exam 3				
13	M	11/18	Third Exam (Ch 20-22)			all	P-Quiz 11	
	W	11/20	34	Metals, coordination complexes	23(23,24)			
	F	11/24	35	Isomers, colors, and magnets	23(23,24)			
14	M	11/25	36	Organics-functional groups	24(25)	none	P-Quiz 12	
	W	11/27	Thanksgiving Break					
	F	11/29	Thanksgiving Break					
15	M	12/2	37	Organics	24(25)	all		
	W	12/4	38	Peptides/sugars/nucleic acids	24(25)			
	F	12/6	39	catch up, Prepare for final exam				
16	M/T	12/9 – 12/13	Final Exam (cumulative)				P-Quiz 13	

For BLB 12th edition chapters 23 and 24 are combined as chapter 22, and organic chemistry is chapter 24. For earlier editions chapters 23-25 cover the material in chapters 23-24 of the 12th edition

Chapter Learning Objectives

Chapt 14: Describe reaction rates in terms of zero, 1st, 2nd, 3rd order processes

Describe reaction rates as a function of temperature

Predict reaction half-lives given initial conditions

Differentiate between the plots of 1st order and 2nd order reactions

Describe the action of catalysis on a chemical reaction

Describe reactions in terms of elementary steps and rate-determining steps

Chapt 15: Write equilibrium constant expressions

Perform calculations of concentrations, pressures using K_{eq} information

Predict the direction of a reaction using the reaction quotient

Explain Le Chatelier's Principle

Chapt 16: Cite essential definitions of acids and bases

Utilize the autoionization of water to define pH and pOH, K_w , pK_w

Employ K_a , K_b values to calculate pH, pOH of solutions of weak acids, weak bases, and salts

Describe chemical factors that contribute to the strength of acids and bases

Chapt 17: Apply concepts of the Common Ion effect to design and construct acid/base buffer systems

Calculate acid/base titration curves and predict end-point conditions

Describe and apply K_{sp} values to determine solubility of inorganic solids

Describe the precipitation and separation of ions utilizing K_{sp} information

Chapt 19: Describe and apply concepts of chemical spontaneity and the 2nd Law of Thermodynamics

Describe and apply the concepts of entropy to chemical reactions

Use Gibb's Free Energy to predict chemical equilibrium

Chapt 20: Balance chemical reactions that involve changes in oxidation states

Express oxidation/reduction in terms of half reactions

Describe voltaic cells and calculate potentials using standard reduction potentials

Predict the spontaneity of oxidation/reduction reactions

Employ the Nernst Equation to calculate cell potentials and chemical concentrations

Describe the essential reactions related to common battery systems and fuel cells

Describe the chemical reactions of corrosion

Chapt 21: Describe and differentiate between fundamental types of radioactivity and radioactive processes

Predict nuclear stability based on proton/neutron ratios

Apply 1st order kinetics for radioactive decay

Compare the energetic and mass aspects of nuclear fission and nuclear fusion

Chapt 22: Describe the fundamental aspects of the reactivity of non-metal elements, including hydrogen, the Noble gases, the halogens

Chapt 23: Describe the structure and bonding in simple coordination complexes of transition metals like Fe, Cu

Predict simple electronic configurations for transition metal ions using the periodic table

Predict magnetism using simple models of Crystal Field Theory

Discuss how the color of transition metal complexes is related to d-orbital splitting

Chapt 24: Identify and draw the structure of hydrocarbon alkanes, alkenes, alkynes, and aromatics

Identify and draw the functional groups ethers, aldehydes, ketones, acids, esters, and amides

Identify the chemical structure of amino acids and polypeptides

Identify the chemical structure of carbohydrates, sugars, and fats

Identify the chemical structure of nucleic acids and DNA, RNA
