Dr. Doug Harris
Office: Maeser Chemistry Lab 157, (435) 797–1609
E-mail: doug.harris@usu.edu (Reply within 2 business working days)

Materials
Safety splash goggles, long-sleeve lab coat, full-length jeans with no holes, and closed-toe shoes, and flash drive are required in the laboratory.
The lab fee of $75 is used to purchase equipment and supplies for the laboratory as well as a small portion for teaching assistant compensation.

Prerequisites
Concurrent enrollment in Chemistry 3700. Prior general and organic chemistry experience is expected.

Grades
A score of 90% is guaranteed an A- and 95% or better is guaranteed an A. Final scores will be rounded to nearest one’s place (94.4% = 94% and 94.5% = 95%).
Signed Safety Documentation................................................................. 20 points
7 Lab reports @ 20 pts........................................................................ 140 points
Teaching Assistant Evaluation (safety, cooperation, independence)........ 20 points
Total........................................................................................................... 180 points

All lab reports are due by the laboratory section meeting time one week after completion of the experiment. Late reports will be assessed a 10% penalty per week. The lab report for the make-up experiment (The Flu Fights Back) will be due at the conclusion of the lab period that it is performed. The Teaching assistant will not declare a student’s final lab course grade.
Policies and Procedures

1. The administration of Chemistry 3710 will adhere strictly to the policies (including the issuing of incompletes) outlined in the USU 2020 – 2021 General Catalog.

2. Qualified students with disabilities may be eligible for reasonable accommodations. All accommodations are coordinated through the Disability Resource Center (DRC) in Room 101 of the University Inn, 797-2444 voice, 797-0740 TTY, or toll-free at 1-800-259-2966. Please contact the DRC as early in the semester as possible. Alternate format materials (Braille, large print or digital) are available with advance notice.

3. Service Animals in the CHEM 3710 lab: Utah State University is committed to providing access for service dog handlers. Due to the unique nature of the laboratory environment service animal handlers must meet with the Disability Resource Center prior to bringing a service dog into the lab. The purpose of this meeting is not to prevent you from having your service animal with you but rather to understand how to best accommodate your needs and the needs of your animal. Please contact the Disability Resource Center at 435-797-2444 or drc@usu.edu to set up an appointment.

4. Group attendance at all the assigned meetings is required. Experiments will not be rescheduled to a different lab section meeting time. A missed experiment which has an excused absence will be made up by appointment only with the last experiment (The Flu Fights Back) during the scheduled lab section meeting time the last week (April 19th – 23rd) of the course. Excused absences include: (1) school excused absences outlined in the general catalog, (2) illness, and (3) a family emergency. Planned family trips, vacations, outings, and weddings are not excused absences. Students should notify the TA in advance, if possible, prior to missing an experiment. Students missing an experiment will have one week to notify the TA that they have a valid excuse. A missed experiment that is not made up will be scored as zero. Only one missed experiment can be made up. If multiple weeks need to be missed due to health reasons, please make the necessary on-line experiment report submission arrangements with your TA.

5. Individuals not wearing safety goggles, full-length jeans with no holes, or closed-toed shoes (no sandals or pumps) will not be allowed in the laboratory, no exceptions.

6. The Banner/Access system will automatically drop a student from the CHEM 3710 lab course if the student drops the concurrently enrolled CHEM 3700 lecture course. Students that have completed all of the experiments up to the Size Exclusion Chromatography may make a special request to Dr. Harris to remain registered for the CHEM 3710 lab course.

Course Objectives and Assessment

This course is designed to provide hands-on experience with techniques and concepts common to biochemistry research. This will be accomplished through a laboratory experience that will involve directed reading, observations of demonstrations, performance of experiments, data analysis, and completion of laboratory reports. This course is intended to be taken concurrently with chemistry 3700.

Learning objectives include:
1. Appreciation of laboratory safety
2. Use of photometry
3. Understanding of chromatography
4. Use of gel electrophoresis
5. Understanding of enzyme kinetics and protein structure

Exposure to these topics is appropriate for all pre-health and pre-vet professionals, along with majors in many other life science areas.

Assessment of the course will include an end-of-semester evaluation seeking suggestions for course improvement.
